

KESHAV YOGI

Full Stack Developer

6376022023 | keshavyogi1234@gmail.com | Chitkara University, Rajpura

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience developing web applications using React.js, JavaScript, Node.js and Express.js. Currently working at BlockCoders, contributing to frontend development, backend API development, database operations, authentication and application debugging.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Vite

Backend: Node.js, Express.js

Database: PostgreSQL, MySQL, Prisma ORM

API: REST APIs, Fetch API

Tools: Git, GitHub, VS Code

Concepts: CRUD, Authentication, Authorization, API Integration, RBAC

EXPERIENCE

Full Stack Developer Intern — BlockCoders

2026 – Present

- Developed full-stack web application features using React.js, JavaScript, Node.js and Express.js.
- Developed and integrated REST APIs for different application modules.
- Worked with database operations using Prisma ORM and SQL databases.
- Implemented CRUD functionality for business application modules.
- Worked on authentication, authorization and protected routes.
- Integrated frontend components with backend APIs.
- Debugged frontend and backend issues and implemented fixes.
- Used Git and GitHub for source control and collaboration.

PROJECTS

OmniHR — Multi-Tenant Employee Management & HR Platform

React.js | JavaScript | Node.js | Express.js | Prisma ORM | PostgreSQL | Tailwind CSS

- Worked on an enterprise platform that helps companies and HR teams manage employee and company data.
- Developed features for employee management, attendance, leave, payroll and company administration.
- Developed and integrated REST APIs for multiple application modules.
- Worked with database models and relationships using Prisma ORM and PostgreSQL.
- Implemented authentication, authorization and role-based access control.
- Worked on employee profiles, custom fields, documents, attendance, shifts, leave and approval workflows.
- Worked on payroll-related functionality and employee salary information.
- Integrated notification and payment-related services and debugged application issues.

OSM — Examination Management System

React.js | JavaScript | Node.js | Express.js | REST APIs

- Worked on a full-stack examination management system.
- Developed features for exams, subjects, papers and allocations.
- Integrated frontend screens with backend REST APIs.
- Worked on role-based workflows for administrators, examiners and moderators.
- Debugged frontend and backend issues and improved application functionality.

EDUCATION

Bachelor of Technology — Computer Science & Engineering
